SUBJECT INDEX

(ANSI) PH3-5 progress report—optical dictionary, American National Standards Institute, 158
American National Standards Institute (ANSI) PH3-5 progress report—optical dictionary, 158
Analysis of stray light, specification of the scattering characteristics of surfaces and systems, for use in the, 108
Aspheric telescope mirror, typical error budget for testing a high-performance, 56
Automated interferogram reduction, 64

Budget for testing a high-performance aspheric telescope mirror, typical error, 56

Characteristics of surfaces and systems, for use in the analysis of stray light, specification of the scattering, 108
Coatings, military specifications applicable to optical, 145
Computer modeling as a tool for optical systems' specifications, 10
Conference on optical scattering standards, 133
Cosmetic defects on mass-produced photographic optics, performance impact of, 104
Cost, specifications as a driver of performance and, 154

Defects on mass-produced photographic optics, performance impact of cosmetic, 104
Diamond-turned surfaces, specifications for, 77
Dictionary, American National Standards Institute (ANSI) PH3-5 progress report—optical, 158
Digitizer system design considerations, image, 33
Discussion of the specification of visual systems, making the qualitative quantitative—a, 42
Drawing practice, national standards organizations and optical, 160
Drawings), outline of tolerancing (from performance specification to toleranced, 2
Driver of performance and cost, specifications as a, 154

Economies in mass production of optics, tolerancing for, 90
Error budget for testing a high-performance aspheric telescope mirror, typical, 56

Germanium, infrared optical grade, 136
Glass and plastic optics—what's the difference?, spacifying, 93
Grade germanium, infrared optical, 136

High-performance aspheric telescope mirror, typical error budget for testing a, 56
High-volume optics, influence of specification on tolerancing of, 30

(IR) optics for thermal imaging, testing and specification for infrared, 19
Image digitizer system design considerations, 33

Imaging, testing and specification for infrared (IR) optics for thermal, 19
Impact of cosmetic defects on mass-produced photographic optics, performance, 104
Influence of specification on tolerancing of high-volume optics, 30
Infrared (IR) optics for thermal imaging, testing and specification for, 19
Infrared optical grade germanium, 136
Institute (ANSI) PH3-5 progress report—optical dictionary, American National Standards, 158
Integrated scattering, standards for optical surface quality using total, 124
Interferogram reduction, automated, 64

Maintain your image: a procurement perspective, 24
Making the qualitative quantitative—a discussion of the specification of visual systems, 42
Mass-produced photographic optics, performance impact of cosmetic defects on, 104
Mass production of optics, tolerancing for economies in, 90
Material, specifications of Raytran® , 141
Measuring optical scatter, proposed specification for, 119
Metal mirror selection guide update, 84
Metal optics, specifications for, 74
Military specifications applicable to optical coatings, 145
Mirror selection guide update, metal, 84
Mirror, typical error budget for testing a high-performance aspheric telescope, 56
Modeling as a tool for optical systems' specifications, computer, 10

National Standards Institute (ANSI) PH3-5 progress report—optical dictionary, American, 158
National standards organizations and optical drawing practice, 160

Optical coatings, military specifications applicable to, 145
Optical dictionary, American National Standards Institute (ANSI) PH3-5 progress report—, 158
Optical drawing practice, national standards organizations and, 160
Optical grade germanium, infrared, 136
Optical scatter, proposed specification for measuring, 119
Optical scattering standards, conference on, 133
Optical surface quality using total integrated scattering, standards for, 124
Optical system, specifying the visual, 48
Optical systems' specifications, computer modeling as a tool for, 10
Optics, influence of specification on tolerancing of high-volume, 30
Optics, performance impact of cosmetic defects on mass-produced photographic optics, 104
Optics, specifications for metal, 74
Optics for thermal imaging, testing and specification for infrared (IR), 19
Optics, tolerancing for economies in mass production of, 90
Optics—what's the difference?, specifying glass and plastic, 93
Organizations and optical drawing practice, national standards, 160
Outline of tolerancing (from performance specification to toleranced drawings), 2

Panel discussion—Open forum on optical systems and component specifications, 164
Performance and cost, specifications as a driver of, 154
Performance impact of cosmetic defects on mass-produced photographic optics, 104
Performance specification to toleranced drawings), outline of tolerancing (from, 2
Photographic optics, performance impact of cosmetic defects on mass-produced, 104
PH3-5 progress report—optical dictionary, American National Standards Institute (ANSI), 158
Plastic optics—what's the difference?, specifying glass and, 93
Practice, national standards organizations and optical drawing, 160
Procurement perspective, maintain your image: a, 24
Production of optics, tolerancing for economies in mass, 90
Progress report—optical dictionary, American National Standards Institute (ANSI) PH3-5, 158
Proposed specification for measuring optical scatter, 119

Qualitative quantitative—a discussion of the specification of visual systems, making the, 42
Quality using total integrated scattering, standards for optical surface, 124
Quantitative—a discussion of the specification of visual systems, making the qualitative, 42

Raytran® material, specifications of, 141
Reduction, automated interferogram, 64

Scatter, proposed specification for measuring optical, 119
Scattering characteristics of surfaces and systems, for use in the analysis of stray light, specification of the, 108
Scattering standards, conference on optical, 133
Scattering, standards for optical surface quality using total integrated, 124
Selection guide update, metal mirror, 84
Specification for infrared (IR) optics for thermal imaging, testing and, 19
Specification for measuring optical scatter, proposed, 119
Specification of the scattering characteristics of surfaces and systems, for use in the analysis of stray light, 108
Specification to toleranced drawings), outline of tolerancing (from performance, 2
Specification on tolerancing of high-volume optics, influence of, 30
Specification of visual systems, making the qualitative quantitative— a discussion of the, 42
Specifications applicable to optical coatings, military, 145
Specifications for diamond-turned surfaces, 77
Specifications as a driver of performance and cost, 154
Specifications for metal optics, 74
Specifications of Raytran® material, 141
Specifying glass and plastic optics—what's the difference?, 93
Specifying the visual optical system, 48
Standards, conference on optical scattering, 133
Standards Institute (ANSI) PH3-5 progress report—optical dictionary, American National, 158
Standards for optical surface quality using total integrated scattering, 124
Standards organizations and optical drawing practice, national, 160
Stray light, specification of the scattering characteristics of surfaces and systems, for use in the analysis of, 108
Surface quality using total integrated scattering, standards for optical, 124
Surfaces, specifications for diamond-turned, 77
Surfaces and systems, for use in the analysis of stray light, specification of the scattering characteristics of, 108
System, specifying the visual optical, 48
Systems, making the qualitative quantitative—a discussion of the specification of visual, 42
Systems, for use in the analysis of stray light, specification of the scattering characteristics of surfaces and, 108

Telescope mirror, typical error budget for testing a high-performance aspheric, 56
Testing and specification for infrared (IR) optics for thermal imaging, 19
Thermal imaging, testing and specification for infrared (IR) optics for, 19
Toleranced drawings), outline of tolerancing (from performance specification to, 2
Tolerancing for economies in mass production of optics, 90
Tolerancing (from performance specification to toleranced drawings), outline of, 2

Tolerancing of high-volume optics, influence of specification on, 30
Total integrated scattering, standards for optical surface quality using, 124
Typical error budget for testing a high-performance aspheric telescope mirror, 56
Visual optical system, specifying the, 48
Visual systems, making the qualitative quantitative—a discussion of the specification of, 42
